Environmental Planning Solutions, Inc.
Description of Key Projects

The Nature Conservancy's Emiquon Education Plan

EPSI was awarded the contract with The Nature Conservancy (TNC) to develop an education plan for the 7,100-acre Emiquon Preserve, a floodplain restoration project on the Illinois River. The education plan was a collaborative effort of the Environmental Planning Solutions, Inc., the Conservancy and its three key partners: University of Illinois at Springfield, Dickson Mounds Museum, and the U.S. Fish and Wildlife Service. The final plan provided the Conservancy and its partners a vision for the future of environmental education within their agencies. EPSI's role was to engage the key partners to identify their educational needs and coordinate with TNC in identifying priority activities.

The Emiquon Education Plan and Visitor Use Plan are not available online, but background on the Emiquon Preserve can be found at:
